

Verizon Wireless Welcomes Shot Tracer® Gunshot Detection Sensor As New Showcase Product

BILLINGS, MT, August 23, 2018

Verizon Wireless has certified Shot Tracer® Technologies, Inc. as a Showcase Product in their Open Development department.

Shot Tracer's comprehensive gunshot and explosion detection devices along with the national coverage of Verizon Wireless elevates the speed in which alerts are sent to emergency personnel. Having a reliable wireless system installed in schools, houses of worship, hospitals, airports and businesses brings a proactive shooting alert system to be in place in case a shooting event takes place.

"I don't want technology to take lives. I want technology to save lives," said Allan Overcast, Tracer Technology Systems President

and CEO. "This technology, which does not require an expensive call center to be used, will enable schools and businesses to have an automated shooting alert system installed in case a shooting event takes place."
